

Bid4efficiency

Bid to lock in our largest incentives

The Bid4efficiency Program is an opportunity for our customers with large projects to lock in our largest incentives by participating in an annual series of on-line reverse auctions held in the fall.

Winning bidders can lock in up to \$500,000 in incentives.

Bid low, win big

If you qualify, you competitively bid by offering progressively lower rates on a price per annual kilowatt hour or a price per watts reduced basis. The low bid wins, and you can lock in that incentive rate for your capital planning for the following year. To be eligible, your business must use more than 200,000 kWh per year, and have preapproved plans for efficiency projects in the coming year.

Incentives range from \$50,000 to \$500,000

Unlike our other programs, there is no cap on Bid4efficiency incentives. In past years, they've ranged from \$25,000 to \$500,000.

Program advantages

- Our largest incentives – up to \$500,000
- Auction held in October to facilitate capital planning
- Allows winning bidders to lock in incentive savings for future year projects

Recent success

AMG Vanadium 2015

Incentives Paid
\$508,000

Annual Energy Savings (projected)
16.4 GWh

AMG Vanadium 2016

Incentives Paid
>\$1,500,000

Annual Energy Savings (projected)
41.0 GWh
